

## **Stilmas Expands its North American Operations with the Acquisition of Mar Cor Purification's High Purity Water Business Based in Burlington Ontario, Canada**

Milan, Italy November 1, 2018/PRNewswire/ – Stilmas is pleased to announce that effective November 1, 2018 it has acquired the assets of Mar Cor Purification's High Purity Water Business based in Burlington, Ontario, Canada. The new company will be named Stilmas Americas, and will serve the North American market, expanding the Mar Cor Purification High Purity water portfolio of products. Mar Cor Purification currently manufactures a line of water purification equipment platforms that are compliant with the current USP and EU Purified Water (PW) and Water for Injection (WFI) standards. They specialize in standard and custom engineered turn-key systems for the Pharmaceutical, Biotech, Cosmetic and Semi-Conductor markets.

The Masco Group, with its Companies Stilmas, Olsa and DOC, is a global market leader in the field of pure water technologies and systems for the pharmaceutical and cosmetic industry. The Masco Group is headquartered in Milan, Italy, with operations in France, China, Russia and USA. Stilmas manufactures state of the art Pharmaceutical Quality Water Systems that include Multiple Effect Stills, Vapor Compression Stills and Pure Steam Generators along with other standard products.

Alberto Borella – CEO Masco Group: “We have found in the High Purity Business Line of Mar Cor Purification the perfect complement of products and competencies to successfully carry out our vision and grow our business. Stilmas Americas will become the reference clean media provider in North America”.

Benjamin Roczniak – President Stilmas Americas: “We are excited that we now have a complete portfolio of State of the Art Biopharma water products that will allow us to provide our customers with complex turnkey solutions”.

Stilmas Americas will be the hub for selling, engineering, manufacturing and servicing Stilmas equipment in North America, becoming a unique player to offer a complete range of pure media technologies in the North American market.
