

Settala, March 12 2020

Dear Partners,

Information on Covid-19 are updating on a daily base and so do we with you.

As you probably heard today the Italian Government has decided a further tight to the nationwide lockdown by closing all the shops, bars and restaurants. Offices and production sites can remain operative if they are able to impose a safe working environment.

We at Masco Group have implemented in the last 4 weeks measures more stringent than the ones imposed by the WHO and the Italian Government.

Today in Stilmas, Olsa and DOC we converted 90% of our white collars to smart working and production has been reorganized with tools and procedures to guarantee a safe working environment. Hence, we are proud to guarantee the business continuity in these critical conditions and we thank you for your support and continuous messages of appreciation.

As usual we will keep you updated during the following days.

Best regards,

Luca Borella

Masco Group CEO
